TECHNICAL INFORMATION FOR TEKNO PRODUCTS 19 - 21

WAVE DRAPE • TEKNO WAVE, STANDARD WAVE & TEKNO SNAP

Wave Drape carriers use a unique **hook system** as opposed to the traditional snaps.

- Wave Hooks allow for more flexibility and ease of use.
- Multiple fullness: 1.8 to 2.7 fullness.
- Easy installation, no force required to place hooks.
- Change hook placements quickly after drape is installed.
- Drapes can be washed even with hooks are installed.

WAVE TAPE

SNAP TAPE

WAVE ADVANTAGE

i Easily compare using our online wave calculator for any rod length. Below we give an example using a 100" rod length comparing 10 versus 12 pocket and 100% versus 80% stacking.

UNOBTRUSIVE DESIGN

Invisible Tekno™ System was created to be compact for an unobtrusive design.

A rail installed with an **Invisible Short Projection Support** projects 1 1/2" from the wall.
A rail installed with an **Invisible Simple** or **Clic Ceiling Support** installs flush to the ceiling with zero light-gap.

Factory makes all deductions for the encap
